DETAILED ACTION

This action is responsive to applicants' request for continued examination received May 8, 2003. Claims 1-9 are currently pending.

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. The rejection of claims 1-8 under 35 U.S.C. 102(b) as being anticipated by Harmer et al, EP 116,422 is withdrawn in view of applicants' amendment and response.

3. Claims 1-9 are rejected under 35 U.S.C. 102(b) as being anticipated by Ginn, US 4,348,292.

Ginn teaches a detergent system containing two layers, one layer a surfactant concentrate, and the other an aqueous builder concentrate (see abstract). An example of such a composition is a detergent containing a surfactant concentrate layer comprising alcohol ethoxylates, isopropanol, perfume, quaternary ammonium surfactants, and water, and a builder concentrate layer containing 63% water and 37% builder (col. 6, example V). These detergents are packaged in a bag or packet where the concentrate layers are injected into the bag or packet. The examiner maintains this teaching satisfies the "keeping the mixtures separate" and the "subsequently or

Art Unit: 1751

substantially simultaneously” method steps of the claims. These concentrates are added to water and so both concentrates are water soluble or readily dispersible in water (col. 2, lines 3-37). The surfactant concentrate layer may have surfactant concentrations of 50%, i.e. the concentrate may be 50% water (col. 3, lines 55-58). The examiner maintains this satisfies the “aqueous mixture” limitation of the claims. As this reference meets all material limitations of the claims at hand, the reference is anticipatory.

4. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Charles Boyer whose telephone number is (703) 308-2524. The examiner can normally be reached on Monday-Friday from 9:30 AM - 6:00 PM.

If reasonable attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Yogendra Gupta, can be reached on (703) 308-4708. The fax phone number for this Group is (703) 872-9310 for non-after-final amendments and (703) 872-9311 for after-final amendments.

Any inquiry of a general nature or relating to the status of this application should be directed to the Group receptionist whose telephone number is (703) 308-0661.
